

I believe that if you invest in a professional artist to photograph your family then you also value the quality of the printed product. All of the products I offer are printed by top of the line professional printers from around the country. I use a specific printer for canvases, a different one for prints and my albums are made by another. Each company specializes in what they do which ensures you are getting the highest quality. When you come into the studio for your portrait or wedding consultation I can show you various samples. What you will see on the following pages is a brief product list with pricing for the most popular products and sizes. Custom orders are always possible. Please feel free to ask any questions that you may have.

I also understand that in today's world everyone wants digital files so that they can share their pictures with family and friends on Facebook and other social networking sites. I always provide the client with a dvd consisting of the digital file of every picture that they have printed free of charge.
